

# Remembering 9/11 - 2,974 WTC Murders

Towers turned to dust... the (estimated) 200 Jumpers... 2,974 dead... Then 10 years later... Brooklyn Youth Chorus, I Will Remember You... "Double Check", John Seward Johnson II's statue, torn from his place at Liberty Plaza Park (Zuccotti Park) and the Kneeling Fireman's Memorial (43rd St.).

**Figure 30.**

**Figure 31.**

## VI. Pulverized to dust Top

The government maintains that the Twin Towers were each hit by aircraft and the subsequent fires weakened the steel in the upper stories, initiating a gravity-driven "pancake collapse," as illustrated in Figure 30. There are many problems with this hypothesis. The most obvious problem with it is the near free-fall speed of the destruction of these buildings (see **Billiard Balls** <http://drjudywood.com/articles/BBE/BilliardBalls.html>). A second problem is the paucity of remaining material. Where are the concrete floors? Where is the office furniture? Where is the office machinery? Where are the filing cabinets? Where is the wall board? Where are the bookcases? They were not there, so most of it appears to have turned to dust, as illustrated in Figure 31.

**Figure 30.** An illustration of what a "pancake collapse" would look like. The rubble pile should be at least 1/8 of the original building height (12.5%).

**Figure 31.** An illustration of what the actual destruction looked like. The rubble pile was no more than 2% of the original building height. Both towers went "poof."

### One Toasted Car on FDR Drive

Figure 66(n). (top left) There is extensive damage to the front of car 2723, including no door handle on the driver's door. There is an unusual, unburned circular area on the rear door. (top right) Figure 66(l) The front half of car 2723 is toasted, but check out the new wax job on the back. Notice the missing front door handle and the untouched back door handle. Source of both photos: Source: <http://www.drjudywood.com/articles/DEW/StarWarsBeam5.html>

Many weird things happened on 9/11. You must wonder, as I do, how vehicles located under a bridge, about .5 mi. from the WTC, were so badly damaged in such an unusual manner, including disappearing door handles. Other photos on Dr. Wood's website show many cars, trucks, buses, similarly damaged, which were located throughout the surrounding area. (Map source: <http://www.drjudywood.com/> and Andrew Johnson <http://www.checktheevidence.co.uk/> )
